Install Details

This update is being distributed as a web host file. The address for the host file is:

https://Redacted/UPDATE_2_0_164.PRD

The file will be installed using Reminder Exchange, programmer access is not required.

Installation:

=====

This update can be loaded with users on the system. Installation will take less than 20 minutes.

Install Example

To Load the Web Host File. Navigate to Reminder exchange in Vista

The screenshot shows a terminal window with the Vista Reminder Exchange menu. The menu has a header with navigation options: '+ Next Screen', '- Prev Screen', and '?? More Actions' followed by '>>>'. Below the header is a list of actions with their corresponding codes: CFE (Create Exchange File Entry), CHF (Create Host File), CMM (Create MailMan Message), DFE (Delete Exchange File Entry), IFE (Install Exchange File Entry), IH (Installation History), LHF (Load Host File), LMM (Load MailMan Message), LR (List Reminder Definitions), LWH (Load Web Host File), RI (Reminder Definition Inquiry), and RP (Repack). The 'LWH Load Web Host File' option is highlighted, and a red arrow points to it. Below the menu, the prompt 'Select Action: Next Screen// LWH Load Web Host File' is visible. The next line shows the prompt 'Input the URL for the .prd file: https://' followed by a redacted URL and '/UPDATE_2_0_164.PRD'.

At the **Select Action:** prompt, enter **LWH** for Load Web Host File

At the **Input the url for the .prd file:** prompt, type the following web address:

https://Redacted /UPDATE_2_0_164.PRD

You should see a message at the top of your screen that the file successfully loaded.

The screenshot shows a terminal window with the Vista Reminder Exchange menu. The menu has a header with navigation options: '+ Next Screen', '- Prev Screen', and '?? More Actions' followed by '>>>'. Below the header is a list of actions with their corresponding codes: CFE (Create Exchange File Entry), CHF (Create Host File), CMM (Create MailMan Message), DFE (Delete Exchange File Entry), IFE (Install Exchange File Entry), IH (Installation History), LHF (Load Host File), LMM (Load MailMan Message), LR (List Reminder Definitions), LWH (Load Web Host File), RI (Reminder Definition Inquiry), and RP (Repack).
